Non-GAAP Information

This release contains certain financial information not derived in accordance with United States ("U.S.") generally accepted accounting principles ("GAAP"). These items include adjusted net income, adjusted diluted earnings per share and free cash flow. We believe that the presentation of adjusted net income, adjusted diluted earnings per share and free cash flow, when considered together with the corresponding GAAP financial measures and the reconciliations to those measures, provide meaningful supplemental information to both management and investors that is indicative of our core operations. We considered these metrics useful to investors because they provide greater transparency into management's view and assessment of our ongoing operating performance by removing items management believes are not representative of our operations and may distort our longer-term operating trends. We believe these measures are useful and enhance the comparability of our results from period to period and with our competitors, as well as show ongoing results from operations distinct from items that are infrequent or not associated with our core operations. We do not, nor do we suggest investors should, consider such non-GAAP financial measures as superior to, in isolation from, or as a substitute for, GAAP financial information. We have included a reconciliation of this additional information to the most comparable GAAP measure following the financial statements below. We do not provide forward-looking guidance for certain financial measures on a GAAP basis because we are unable to predict certain items contained in the GAAP measures without unreasonable efforts. These items may include acquisition-related costs, litigation charges or settlements, impairment charges, and certain other unusual adjustments.

Comparable Sales

Comparable sales is a key metric that refers to period-over-period comparisons of our sales excluding the impact of acquisitions, foreign currency and other. We consider this metric useful to investors because it provides greater transparency into management's view and assessment of the our core ongoing operations. This is a metric that is widely used by analysts, investors and competitors in our industry, although our calculation of the metric may not be comparable to

similar measures disclosed by other companies, because not all companies and analysts calculate this metric in the same manner.
